

Access Manager Appliance 4.5 Service Pack 3 Patch 2 Release Notes

March 2021

Access Manager Appliance 4.5 Service Pack 3 Patch 2 (4.5.3.2) supersedes Access Manager Appliance 4.5.3. Hotfix 1.

For the list of software fixes and enhancements in the previous release, see [Access Manager Appliance 4.5 Service Pack 3 Hotfix 1 Release Notes](#).

For information about Access Manager support lifecycle, see the [Product Support Lifecycle](#) page.

If you have suggestions for documentation improvements, click **Comment on this topic** at the top or bottom of the specific page in the HTML version of the documentation posted at the [Documentation](#) page.

What’s New?

This release adds support for upgrading the base operating system of Access Manager Appliance from SLES 11 SP4 to SLES 12 SP5. A fresh installation is not supported. This upgrade involves the following actions:

1. Upgrading the base operating system.
2. Running the product upgrade script.

This upgrade is supported from Access Manager 4.5 and later versions.

For more information about the upgrade process, see [Upgrading the Base Operating System](#) in the *“NetIQ Access Manager Appliance 4.5 Installation and Upgrade Guide”*.

Updates for Dependent Components

This release adds support for the following software:

- ◆ Apache http version 2.4.43
- ◆ Tomcat 8.5.57
- ◆ Open JDK 1.8 Update 252

Verifying Version Numbers After Upgrading to 4.5.3.2

To verify the version numbers, perform the following steps:

- 1 In Administration Console Dashboard, click **Troubleshooting > Version**.
- 2 Verify that the **Version** fields display as follows:

Component	Version
Administration Console	4.5.3.2.31
Identity Server	4.5.3.2-31
Access Gateway	4.5.3.2.31

Operating System Channel Registration

You need to procure the license key from the [Software License and Download](#) portal to register to the 4.5.3 Patch 2 channel. For information about how to download the product from this portal, watch the following video:

<http://www.youtube.com/watch?v=esy4PTVi4wY>
