NetIQ Identity Manager Designer 4.9 Service Pack 1 Patch 1 Release Notes

March 2025

This version of Designer (4.9.1.0100) resolves a previous issue in the Form Builder component. This document outlines the instructions to apply this patch. For more information on Form Builder, see NetIQ Identity Manager - Administrator's Guide to Form Builder.

For the list of software fixes and enhancements in the previous release, see NetIQ Identity Manager Designer 4.9 Release Notes.

For more information about this release and for the latest release notes, see the Identity Manager Documentation (https://www.netiq.com/documentation/identity-manager-49/) page. To download this product, see the Software Licenses and Downloads (https://sld.microfocus.com) portal.

Resolved Issues

OCTCR56A689165: Designer's Form Builder requires an internet connection. When offline, text entry fields with Custom Default Value and Calculated Value are not displayed.

Updating Designer

You must be on Designer 4.9 or 4.9.1 at a minimum to apply this update. You can update Designer using one of the following methods:

- "Online Update (Using the Auto-Update Feature)" on page 2
- "Offline Update (Using the Download Page to Apply the Update)" on page 2

Online Update (Using the Auto-Update Feature)

You can apply this update using the built-in auto-update feature of Designer. The auto-update feature notifies you of new features available at the Designer Download Site. This feature allows you to download Designer package and software updates when the computer that has Designer installed is connected to the Internet.

1. Launch Designer.
2. Click **Help** > **Check for Designer Updates**.
3. Click **Yes** to accept the Designer updates.
4. Restart Designer for the changes to take effect.

Offline Update (Using the Download Page to Apply the Update)

This release includes the `Designer_update~4.9.1_P1.zip` for updating Designer. You can perform an offline update of Designer when a computer with Designer installed is not connected to the Internet.

To update Designer in an offline mode, create an offline copy of the Designer update files. Then, configure Designer to apply the patch updates from the files copied to the local directory.

To create an offline copy of the Designer update files:

1. Log in to the computer where Designer is installed.
2. Download the `Designer_update~4.9.1_P1.zip` file from the Software License and Download (https://sld.microfocus.com/) portal.
3. Extract the downloaded files into a local directory.

To configure Designer to read the patch updates from the local directory:

1. Launch Designer.
2. Click **Windows** > **Preferences**.
3. Expand the **NetIQ** option and click **Identity Manager**.
4. Click the **Updates** tab.
5. For URL, specify the location depending on your Designer installation OS:

   For Linux mounted ISO, use the following URL format:

   ```
   file:///<extracted_location>/updateSite1_0_0/
   ```

   For Windows, use the following URL format:

   ```
   file:///C:\<extracted_location>\Designer_update~4.9.1_P1\updateSite1_0_0
   ```

   For macOS, use the following URL format:

   ```
   file:///<extracted_location>/updateSite1_0_0
   ```
6. Click **Apply**, then click **OK**.
7. Click **Help** > **Check for Designer Updates**.
8. Select the required updates and click **Yes** to accept and update the Designer.
9. Restart Designer for the changes to take effect.

Known Issues

NetIQ Corporation strives to ensure our products provide quality solutions for your enterprise software needs. There are no new issues other than the issues mentioned in the NetIQ Identity Manager Designer 4.9 Release Notes. If you need further assistance with any issue, contact Technical Support (https://www.microfocus.com/en-us/support).
