

OpenText Advanced Authentication 25.1.0.2 (v6.5.0.2)

May 2025

OpenText Advanced Authentication 25.1.0.2 (v6.5.0.2) includes enhancements, improves usability, and resolves several previous issues.

Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [OpenText Advanced Authentication forum \(https://community.opentext.com/cyberres/access-management/adv-auth\)](https://community.opentext.com/cyberres/access-management/adv-auth) on OpenText Cybersecurity Communities, our online community that also includes product information, blogs, and links to helpful resources. You can also post or vote for the ideas of enhancement requests in the [Ideas forum \(https://community.opentext.com/cyberres/access-management/adv-auth/i/ideas\)](https://community.opentext.com/cyberres/access-management/adv-auth/i/ideas).

For more information about this release and the latest release notes, see the [OpenText Advanced Authentication Documentation \(https://www.netiq.com/documentation/advanced-authentication-65/\)](https://www.netiq.com/documentation/advanced-authentication-65/) page.

If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of the specific page in the HTML version of the documentation posted at the [OpenText Advanced Authentication Documentation \(https://www.netiq.com/documentation/advanced-authentication-65/\)](https://www.netiq.com/documentation/advanced-authentication-65/) page.

IMPORTANT:

- ♦ This release includes only server-side updates for OpenText Advanced Authentication, with server version 25.1.0.2 (v6.5.0.2). Ensure that no client-side updates are included in this release, so the corresponding client version remains at 6.4 Service Pack 3 Patch 3.
 - ♦ The administration portal displays the **Verification** method, intended only for internal processing between OpenText Advanced Authentication components. Administrators can edit it, but it has no configurable settings and does not affect user functionality.
 - ♦ This release does not include the Helm Chart. Therefore, fresh installations or upgrade to OpenText Advanced Authentication 25.1.0.2 (v6.5.0.2) on Amazon Web Services (AWS) and Azure Kubernetes Services (AKS), and upgrades through Helm are not supported.
-

What's New

OpenText Advanced Authentication 25.1.0.2 (v6.5.0.2) provides the following enhancement:

- ♦ [“Ability to track the failed login data” on page 2](#)

Ability to track the failed login data

The **Authenticators** report is enhanced to include the **Last Logon Failure** and **Failed Attempts** field information. These fields display the date and time of the most recent failed logon attempt and the total number of failed logon attempts for each user and method.

Resolved Issues

This release includes the following software fixes:

Component	Description of the Issue
Administration Portal	After exporting the logs, the web server's uwsgi . Log file was missing from the /opt/AuCore/logs/directory.
Enrollment Portal	Pre-condition: The Lockout options policy is set to OFF . While logging into the enrollment portal, the user account is locked out after 10 non-consecutive failed attempts. This is because the system continues to count all the failed attempts cumulatively, even if the user successfully logs in between the failed attempts.

Upgrading Advanced Authentication

You can directly upgrade from OpenText Advanced Authentication 25.1 (v6.5) and 6.4 Service Pack 3 Patch 3 to version 25.1.0.2 (v6.5.0.2). However, you cannot upgrade directly from version 6.4 Service Pack 3 Patch 2 or earlier to version 25.1.0.2 (v6.5.0.2).

The recommended upgrade order from version 6.4 Service Pack 3 Patch 2 or earlier to version 25.1.0.2 (v6.5.0.2) is as follows:

- 1 Perform Online upgrade to OpenText Advanced Authentication 6.4 Service Pack 3 Patch 3.

NOTE: If the OpenText Advanced Authentication 25.1 (v6.5) is installed from ISO, the Online upgrade from version 6.5.0.0 to 6.5.0.2 can be performed.

- 2 Perform Product upgrade and then Online upgrade to OpenText Advanced Authentication 25.1.0.2 (v6.5.0.2).

NOTE: The following is the recommended upgrade sequence:

1. OpenText Advanced Authentication servers
2. Plugins
3. Client components

Any deviation in the upgrade sequence is not supported.

NOTE: The RAM requirement for OpenText Advanced Authentication 25.1.0.2 (v6.5.0.2) is 12 GB per server. For more information, see [Advanced Authentication system requirements](#).

Known Issues

OpenText Advanced Authentication 25.1.0.2 (v6.5.0.2) have the following known issues:

Logon Filter Issue on Windows 11

Issue: When the Local Security Authority (LSA) protection is enabled on Windows 11, the user group remains unchanged with the Logon filter.

Workaround: Disable LSA protection.

To disable LSA protection, follow the steps in the [Disable LSA protection \(https://learn.microsoft.com/en-us/windows-server/security/credentials-protection-and-management/configuring-additional-lsa-protection#disable-lsa-protection\)](https://learn.microsoft.com/en-us/windows-server/security/credentials-protection-and-management/configuring-additional-lsa-protection#disable-lsa-protection)

Bluetooth Method is Not Working on macOS 14 and macOS 15

The Bluetooth eSec method does not work on macOS14 and macOS15 due to permission issues. The following error message will be displayed:

The Bluetooth device is incorrect

Issue with Pie Chart Widget

When the data is below 5% of the threshold, the data is hidden in the **Pie Chart** Widget on the dashboard.

Deprecated Options

The following options are deprecated in this release and will not be available in the upcoming release:

- ♦ Old Enrollment Portal
 - ♦ The Old Enrollment Portal is deprecated.
 - ♦ The new features and functionalities are implemented only in the New Enrollment Portal.
 - ♦ Starting with the OpenText Advanced Authentication 6.4 Service Pack 2 release, the New Enrollment Portal is the default enrollment option (**Enable New Enrollment Options** in the **Enrollment Options** policy is set to **ON**).
- ♦ Repo Agent
 - ♦ The Repo Agent is deprecated starting with the OpenText Advanced Authentication 6.4 Service Pack 3 release.
 - ♦ The configuration details related to Repo Agent are available. The administrator cannot add new external repo details on the Administration Portal.

NOTE: There is no equivalent replacement for the Repo Agent. If you used the Repo Agent previously, you must configure a VPN to ensure connectivity between your datacenter and cloud infrastructure.

Planned End of Support

Support for the following operating systems will be deprecated in the upcoming release:

- ♦ CentOS 7
- ♦ Debian 10

For more information about the supported operating systems, see [Advanced Authentication system requirements](#).
